Welcome

With so many options available, there's every reason to hear your world in perfect harmony.

Our range of hearing aids include the fully subsidised and partially subsidised or 'top ups' which mean you can contribute to the cost of the devices, giving you extra features which will help you to hear in noisy situations.

You can choose from our fantastic range of accessory products that help you on the phone, hear the doorbell, alarm clock, the TV, the stereo or for better hearing in meetings, classrooms or face-to-face.

Our qualified clinicians will help you find the hearing solution that considers your needs, your preferences and lifestyle.

News

We are delighted to launch our summer Hearing Solutions catalogue, showcasing different products that can help you hear in every part of your life.

From hearing aids which enhance speech and sound in different situations to listening to the television at your preferred volume.

Let us help you improve your hearing in any listening situation.

Visit any of our 110 hearing centres around the country to find out more about solutions to help you stay connected.

Hearing devices

motion300

Hear better at family gatherings with the motion300. Join in conversations and experience the convenience of making adjustments using your remote control. Motion300 offers many great features, including the ability for your two hearing aids to communicate with each other for the most effective sound (e2e wireless) and the ability to minimise whistling without reducing speech quality (feedback blocker).

Features

- 8 channels
- e2e wireless
- Directional microphone
- Feedback blocker
- Range of remote controls

motion500

The perfect device for hearing comfortably in noise. Enjoy hearing others well and take advantage of the compatibility with Bluetooth technology, delivering superior hearing performance. The motion500 offers great sound and reduction of background noise. It also automatically learns your overall volume preferences.

Features

- 12 channels
- e2e wireless
- Directional microphone
- Feedback blocker
- Data learning
- Range of remote controls

motion700

The best in natural sound, sound comfort and learning. Within the motion range, the motion700 has the greatest capacity to enhance speech, reduce noise and pick up the subtle differences in sounds, helping you to enjoy music more.

Unlike other hearing devices, the motion700 helps you determine the location of sound from front and back. It also enhances the perception of higher frequencies and 'learns' how you like your hearing aid to sound in different settings.

Features

- 16 channels
- TrueEar
- Directional microphone
- Sound learning
- e2e wireless
- Sound Brilliance
- Feedback blocker
- Range of remote controls

options

Adjust your hearing aids with a remote control

Even though your hearing aids cope well in many different situations there may be times when you would like to adjust the volume or change program. With a remote control, you can do this easily and discreetly without having to touch your hearing aids. Please ask us about our range of remote controls.

Recharge your hearing aids

Australian Hearing offers the option of a recharger with many Behind-the-Ear (BTE) hearing aids. Alleviating the need for battery changes. You simply place your hearing aids on the recharger – just like a mobile phone. Simple, hassle-free and environmentally friendly. See our centres for more information.

Entertainment and phone

Enjoy television at your preferred volume

There's no longer any need to turn the TV down to accommodate others. Avoid family feuds and enjoy the sound quality of the Sennheiser Set 840-TV. These wireless headphones enable you to set the volume at any level and sit back and enjoy your own personal sound sensation. Ideal for television and other audio equipment, such as the radio and stereo. Sound even transmits through walls, so never miss a moment of your favourite show, even if you get up to go to the kitchen.

Product: 840-TV Stetaset RF

RRP: **\$446**

(A t-switch compatible model is also available)

Wireless headphones for all your audio needs

Enjoy wireless freedom, stereo sound and speech intelligibility with Sennheiser's award-winning headphones for people with a moderate hearing loss. Wander the house and hear through walls and ceilings, block out background noise and adjust the left and right to suit you. Compatible with the TV, MP3 players and laptops. Recharging is simple and comes with a two-year warranty.

Product: RS 140 wireless RF headphone system

RRP: **\$449.95**

buy a second set of headphones for \$299.00

Listen to music in stereo via your t-switch

Hear true stereo sound with the Music Link Freedom Stereo. Simply select the t-switch on your hearing aid or BTE cochlear implant processor and tune into your favourite tracks. The discreet inductive hooks sit behind the ear and the 3.5mm plug fits into any product with a headphone jack.

Product: Music Link Freedom Stereo

RRP: **\$89**

Hear better on the phone

Increase volume and sound clarity on your phone with a telephone coupler. Simply attach this small portable device to the earpiece of your telephone to amplify the incoming sound to your preferred volume. Compatible with the t-switch on your hearing aid, the coupler can be used on standard and cordless telephones and payphones (not mobiles).

Product: Telephone coupler strap on TA-1

RRP: **\$80**

Personal listening and FMs

Amplify sound without hearing aids

Turn up the volume with your own personal amplifier. Simple to use, the Bellman Audio Maxi provides clear and crisp sound through headphones, earbuds or a stethoclip. Clarify speech and reduce background noise with this fantastic alternative to hearing aids.

Connect straight to your multimedia equipment with the audio cable kit, which comes as an optional extra. Provides excellent stereo sound directly from your TV or music player to your ears. An external microphone is also available, which is ideal for the car or speaker of your TV.

Product: Bellman Audio Maxi

Optional accessories: external microphone and audio cable

RRP: \$279 - \$337

\$29 (extra microphone), **\$49** (cables)

No more sleeping in, or missing the phone

Wake up to the Oricom Alarm Clock and Shaker which can vibrate, flash and sound, depending on your preferences. It can also connect to your phone, so you can see when someone is calling. It's simple to use, with extra loud volume, a flashing strobe light and a vibrating shaker. The oversized time display makes, for easy reading.

Product: Alarm Clock and Shaker

RRP: \$110

Never miss the front doorbell again

Someone at the door? This portable device sounds and flashes, letting you know exactly when your visitor has arrived. Simply attach the doorbell button to your front door and then take the receiver around the house as you wish. It's simple to install and comes with seven distinct sounds.

Product: Wireless Door Chime

RRP: \$70

Turn up the volume one to one

Want a direct communication link between you and your partner, teacher or any other individual? Hear someone over a distance or in a noisy environment using a wireless FM system, which delivers sound directly to your ears. Ideal for the classroom, meetings, busy restaurants, in the car or on the phone. The speaker wears a small microphone and transmitter and the hearing aid user wears the receiver. It's just like a personal one-to-one radio system. Perfect for managing a mild hearing loss or for use in conjunction with hearing aids.

All our FM systems come with a free charger and two year warranty. Ask our staff about our range of FM systems.

Cost: \$1,200 - \$1,900

(subsidised for children and some adults)

Accessing our services

At Australian Hearing, our highly trained staff offer professional advice in conjunction with our usual services, which are free for eligible* people.

Our services include:

- rehabilitation programs to effectively manage hearing loss
- consultations and hearing tests
- fully fitted digital hearing aids
- unlimited batteries and repairs.

If you or someone you know is eligible for our services, please fill in the Application for Hearing Services Voucher (available from our centres) and post it to the address shown on the form OR take it to your nearest Australian Hearing centre.

You will receive a voucher pack in the mail which entitles you to free hearing services.

You can then phone **131 797** to make an appointment for a free hearing assessment with Australian Hearing.

Unlimited batteries and repairs

Receive unlimited batteries and repairs on your hearing devices with our Hearing Services Card. Our maintenance services include mechanical and electrical repairs, earmould and shell renewal and repair, cord replacement and microphone replacement. We can also clean your hearing aid and make sure it's delivering the best sound for your needs.

The Hearing Services Card is available at our centres for a nominal annual fee.

* Eligible people[†] are entitled to fully or partially subsidised hearing devices depending on their clinical needs under the Australian Government Hearing Services Program. [†]To be eligible to receive services under this program, a person must be: an Australian pensioner concession cardholder or their dependant; a Department of Veterans' Affairs gold or white repatriation cardholder (specifically for war-related hearing loss) or their dependant; a sickness allowance recipient or their dependant; a referred client of an Australian Government funded vocational rehabilitation service; a member of the Australian Defence Forces; an Australian citizen or permanent resident under 21 years of age; an Aboriginal or Torres Strait Islander person aged over 50 years, or who is a current participant of a Community Development Employment Project, or who was participating in this program between 1 December 2005 and 30 June 2008.
